It is difficult in most instances for the A&RC to determine which of these disposition actions were a part of the Purge and which were routine disposition actions that would have been destroyed without the Purge. However, the 138 cu. ft. authorized by OBGI, the 434 cu. ft. authorized by CRS, and the 685 cu. ft. authorized by FMSAC was a direct result of the Purge.

Most of the disposition action taken on the Supplemental Distribution items (410 cu. ft. transferred and 712 cu. ft. destroyed) was authorized by OBGI as a result of the Purge. 400 cu. ft. of NIS tab cards were transferred to Army Map Service and 675 cu. ft. of NIS reports were authorized for destruction.

The total disposition actions for the first 6 months of FY 1969 (6,783 cu. ft.) was 2,463 cu. ft. more than the first 6 months of FY 1968 (4,320 cu. ft.).

#### 4. Archives

The Archives received 100 cu. ft. of Agency and Foreign Government produced intelligence reports. These reports are currently being checked with the Archival holdings, and many of the reports are needed to fill in gaps in the Archives. Duplicate reports are destroyed.

The Archives personnel, as time permits, are pulling together source documents for the history of Records Management in the Agency.

NPIC requested 386 documents from Supplemental Distribution to be included in the Johnson Presidential Library.
